INVISIBLE NO MORE!

Invisible disabilities refer to symptoms such as debilitating pain, fatigue, dizziness, cognitive dysfunctions, brain injuries, learning differences and mental health disorders, as well as hearing and vision impairments. These are not always obvious to the onlooker, but can limit daily activities, range from mild challenges to severe limitations, and vary from person to person. Hear from speakers who share their stories of living with invisible abilities as well as experts who supports these members of our community. Learn how you can better understand and support those with invisible disabilities. LET’S TALK ABOUT IT! ALL ARE WELCOME.

Thursday, October 18, 2018
12 – 1 p.m.
Education Building
2222 (2nd floor Auditorium)

RSVP via Eventbrite: https://invisibledisabilitydialogue.eventbrite.com
Lunch provided (first come, first serve)
