DRUGS OF ABUSE, MECONIUM W/ CONFIRMATION

There is a change in the analytes that are being tested in the Drugs of Abuse Meconium w/Confirmation panel. Analyte PROPOXYPHENE is being deleted and will no longer be part of the panel. In addition, a new analyte BUPRENORPHINE is being added.

The following analytes will be included in the panel:

MARIJUANA
COCAINE
OPIATES
PHENCYCLIDINE
AMPHETAMINES
BARBITURATES
METHADONE
BENZODIAZEPINES
BUPRENORPHINE (added)

Due to these changes, the test will not be available as an orderable in EMR for a short time so that the orderable test in EMR can be changed to reflect both the deleted and new analyte in the panel. During this time, please order the test as a LABORATORY MISCELLANEOUS ORDER and please include the DRUGS OF ABUSE, MECONIUM W/ CONF test name in the comment section.

When Drugs of Abuse Meconium w/confirmation is available again in EMR as an orderable test, you will be notified by a future First Tuesday notification.

If you have questions or need additional information please contact Laboratory Client Services at 734-7373 or email pathologyclientservices@ucdmc.ucdavis.edu.
