Change Celiac Serology test

**CELIAC SEROLOGY**

Effective Nov 3, 2015 and in continuation with the UC Davis Medical Center Choosing Wisely Initiative, the above Prometheus Laboratory test will be automatically converted upon receipt within the Laboratory into components using tests that are analytically and clinically comparable. The change in testing improves quality of care by decreasing turnaround time, mitigating inaccuracies due to sample processing delays by performing the majority of testing in-house, and significantly reducing overall test cost to the patient, insurers, and institution:

**ANTI-ENDOMYSIAL ANTIBODY IgA**

Ordered as Lab Miscellaneous test (ARUP)

TAT = 1-5 days
Reference range = Less than 1:10

**CELIAC PANEL, REFLEXED**

TAT = 3-4 days
Reference range:
- Total IgA (by age) see report
- tTg, IgA <7 EliAU/mL
- tTg, IgG <7 EliAU/mL
- De-amidated Gliadin, IgA <7 EliAU/mL
- De-amidated Gliadin, IgG <7 EliAU/mL

At this time, the collection requirement is unchanged.
