UC Davis Medical Group Directory
Your guide to primary and specialty health-care providers

Patient information and appointment assistance:
800-2-UCDAVIS
(800-282-3284)

Provider referral and transfer assistance:
800-4-UCDAVIS
(800-482-3284)

medicalgroup.ucdavis.edu
UC Davis Medical Group offers nationally renowned primary care and specialty expertise based at UC Davis Medical Center and multiple medical offices across the greater Sacramento region. Medical group physicians, nurse practitioners and clinical nurse specialists emphasize wellness and prevention, apply the latest knowledge to solve health problems and offer access to promising clinical trials, newly proven therapies and advanced technologies when needed.

FOR PATIENTS

Find a UC Davis physician, nurse practitioner or clinical nurse specialist
Consumer Resource Center: 800-2-UCDAVIS (800-282-3284)

• General information about available providers and services
• Assistance with appointments and referrals
• Information about accepted insurance plans

Established UC Davis patients can also use the MyChart web-based portal to communicate with their care teams, request certain appointments and refills, access medical records and more.

FOR HEALTH PROFESSIONALS

Outpatient referrals and provider phone consultations
UC Davis Physician Referral Center: 800-4-UCDAVIS (800-482-3284) Option #2 Monday | Friday, 8 a.m. to 5 p.m. Or online (non-urgent) requests via referrals.ucdavis.edu

• Information about availability of specialty services
• Coordination and status of referrals to specialty services
• Assistance for provider-to-provider phone consultations with specialists

Acute interfacility transfers and after-hours consultations
24/7 Transfer Center: 800-4-UCDAVIS (800-482-3284)

• Round-the-clock, R.N.-led coordination of acute interfacility transfers
• After-hours coordination of emergent provider-to-provider telephone consultations for complex or unusual cases
• Transfer requests evaluated based upon clinical urgency, availability of resources and other factors

Referring physicians can receive real-time access to test results and clinical information for their patients at UC Davis through the PhysicianConnect online electronic medical record.
Muna Alnimri, M.B.B.S.

Philosophy of Care
Dr. Alnimri is interested in desensitization protocols and new trials in immunosuppression.

Clinical Interests
Dr. Alnimri's goal is to provide outstanding medical care to patients, to participate in teaching residents and medical students and to be involved in clinical research and new trials of immunosuppressive medications.

Dr. Chen's goals are to provide excellent medical care of our patients, conduct clinical research to advance the field of transplantation, and train the next generation of nephrologists.

Dr. Chen's clinical interests include the evaluation of kidney and pancreas transplant recipients, the evaluation of living kidney donors, and the care of post-transplantation patients.

Dr. Chen's research interests include elderly kidney transplant recipient evaluation and outcomes, acute kidney injury, disparities in transplantation access and outcomes, organ usage and outcomes in diseased donor kidney transplantation.

I chose my specialty because I had an interest in microbiology. Most of the new and challenging syndromes are connected with infectious diseases. Humor and compassion are the methods I use in my practice. I try to personalize patient care to the needs of each patient. In my view, appropriate immunizations and the patient's educational knowledge about his or her condition are most important for good health. In addition, at UC Davis, we have a vital facility that generates new knowledge and the specialists necessary to handle the most complex cases.

Stuart H. Cohen specializes in clinical infectious diseases and infection control in the hospital environment. He is interested in AIDS, HIV infection and treatment of immunocompromised patients and serves as primary infectious diseases consultant to transplant programs. Cohen uses molecular biology to investigate epidemiology of resistant microorganisms. His laboratory-based studies look at susceptibility testing of HIV clinical isolates to multiple antiretroviral agents. Additional research focuses on new antimicrobial agents and chemokine and cytokine level changes.

My goal is to provide the care and advice that I would want for myself or my family. I pride myself on considering all options for the treatment of any condition, not just those that are surgical. I also pride myself on listening to patients and their families. Having any medical problem is difficult, navigating health care should not add to that problem. I also try always to be available for questions as oftentimes they arise between visits.

Dr. Colquhoun is a surgeon specializing in cancer of the liver, liver, biliary and pancreatic surgery. He completed fellowship training in both transplantation and surgical oncology at UCLA. He is board certified in both surgery and critical care.

Dr. Colquhoun was the director of the Liver Transplant and Pancreaticobiliary Surgery Program at Cedars-Sinai in Los Angeles for 20 years. He was also director of transplantation at the University of Southern California.

His clinical and research interests involve both primary and metastatic liver tumors, including hepatocellular carcinoma, cholangiocarcinoma, colorectal malignancies and neuroendocrine tumors. He has extensive experience in pancreatic malignancies as well.

Dr. Colquhoun is involved in clinical and translational research aimed at improving both the diagnosis and treatment of hepatocellular carcinoma as well as other primary and metastatic liver tumors such as colorectal cancer and neuroendocrine tumors.

**Philosophy of Care**

Coinciding with the mission of the Department of Internal Medicine, my goal is to provide excellence in clinical care, research and education, and to deliver high-quality medical care with commitment to cutting-edge research and superior physician training.

**Clinical Interests**

My clinical interests focus on kidney and kidney-pancreas transplantation and Nephrology. My research focuses on seeking a better understanding of cardiovascular disease in individuals with chronic kidney disease and approaches to early detection and intervention. I am also interested in renal transplantation access, outcomes research, and recurrence of renal disease after transplantation.

Dr. McVicar is a very experienced transplant surgeon, active in the field since 1990. He brings a compassionate, patient focused approach to his specialty, and his attention to detail results in outstanding patient outcomes. His current clinical practice includes kidney and pancreas transplantation, hepatobiliary surgery, and dialysis access surgery.

John P. McVicar has extensive training as a liver transplant surgeon. He has performed more than 400 solid organ operations, including kidney and kidney-pancreas transplantation. He also performs dialysis access procedures. McVicar's research focuses on immunosuppressive therapy, prevention of infections, management of patients with hepatitis C, and treatment of postoperative biliary problems.

Philosophy of Care

Dr. Sageshima believes that "transplantation" requires teamwork among multidisciplinary team members, and a patient and family members are the most important part of the transplant team. As a transplant surgeon, he aims to provide more opportunities and better outcomes to patients with end-stage organ disease by optimizing organ recovery, preservation, transplant surgery and pre-/post-surgery management.

Clinical Interests

Dr. Sageshima is a transplant surgeon offering care for patients with end-stage organ disease. He has special clinical interest and expertise in adult and pediatric kidney and pancreas transplantation, organ recovery and preservation, live donor surgery, and vascular and peritoneal access surgery.

Research/Academic Interests

Dr. Sageshima's research focuses on improving the transplant outcomes, especially through new methods of organ recovery, preservation, and transplantation. He also has interest in clinical and translational transplant research.

Christoph Troppmann has expertise in pancreas, kidney and intestinal transplantation. His clinical interests also include use of living organ donors, including the application of laparoscopic surgical techniques; pancreas transplantation for improved quality of life in addition to prevention and treatment of secondary complications in people who have insulin-dependent Type I diabetics; and surgical interventions in patients with end-stage organ failure. Troppmann is conducting research in pharmacologic and immunomodulatory treatment protocols to decrease rejection, and the impact of the quality of early post-transplant graft function as well as of acute and chronic rejection on long-term outcomes. He is fluent in English, German, French, Dutch and Spanish.
